INTERACTIVE DEVELOPMENT

Assignment: **A07.1 "Website Distillery: Color Guide"**   Date Assigned: Friday, 10/29/21

Course: GRDS 3243 Interactive Development   Instructors: Maxx Crawford / Bryan Alexis

ASSIGNMENT:

This project will use the same website you used for the website distillery wireframe project.

Take your distillery site and do and determine all the colors they use across the site. Note each of these use-cases. You will reuse the type specimen repo and create a new webpage displaying color swatches. This should be mobile first/responsive.

OBJECTIVE:

The primary focus of this phase of the project will be two-fold: mastering the inspect tool to see how CSS is being rendered on the web and to create a well-designed page showing the colors in use.

DELIVERABLES:

A link to a GitHub Pages (GitHub.io) URL, serving your HTML file and CSS file.

TECHNICAL REQUIREMENTS:

- Use the same repo as 7.0.
- No in-line CSS allowed
- Include the context in which it's used, a color name and a hex code.
- Add functionality via JavaScript to copy the hex code to the users' clipboard, if they click on the color swatch.

NOTES:

- Remember to use the web inspector tool (Chrome, Firefox) to see colors in context. Note that you may have to convert colors from other formats into hex code.

SUBMISSION INSTRUCTIONS:

Please send a GitHub Pages URL (*github.io*) to your project to Maxx Crawford via Slack DM.

TIMELINE/DUE DATE:

Design Check-in: Wednesday, Nov 3, 5:00 PM
Final: Friday, Nov 5 – 9:00 AM CDT
